## Summary:

Experienced full-stack developer with a strong background in PHP, AngularJS, Third party integrations, and Mysql, followed by a transition to Laravel. I have dedicated 18 months to honing my skills in PHP native and AngularJS development, also dedicated over 1 year with laravel to honing integration skills with social media marketing platforms (Facebook, Tiktok, Snapchat), successfully delivering robust and scalable solutions.

---

## Education:

Helwan University | Helwan, Cairo

**Computer science** | 09/2021

Graduated with a Bachelor's degree in Computer Science from Helwan University, where I achieved a strong academic performance overall. **While my GPA stood at a respectable C+,** it is important to note that I excelled in **my Graduation project, earning an exceptional A+ grade.** This accomplishment showcases my dedication, proficiency, and commitment to delivering high-quality work. Throughout my academic journey, I gained a solid foundation in various computer science principles and technologies, including algorithms, data structures, software engineering, database management, and network architecture. Moreover, my time at Helwan University nurtured my problem-solving mindset and honed my teamwork abilities, enabling me to collaborate effectively in diverse environments.

## Experience:

[Mitsike Store](#)

Co Founder | **03/2025 - Present**

- Developed and maintained from A-Z for core product features.
- Integrated purchasing APIs with Smile.one in game recharge provider.
- Contributed to identifying and resolving critical issues during development and production.
- Contributed to create business identity and project management contracts.
- Responsible for external providers integration and contracts.

[Converted-in](#) | **Maadi, Cairo**

Senior Backend Developer | **04/2024 - Present**

- Developed and maintained APIs for core product features.
- Integrated marketing APIs with platforms like Snapchat and TikTok.
- Ongoing improvements to integration with Facebook and other platforms.
- Contributed to identifying and resolving critical issues during development and production.
- Managed and organized back-end release processes, ensuring smooth deployments.
- Collaborated with the DevOps team to implement necessary needs for new features.

[Converted-in](#) | **Maadi, Cairo**

Junior Full Stack Developer | **04/2023 - 04/2024**

working as a full-stack developer at Converted-in, where I contribute to the development of the backend API for the [Flyerz](#) mobile application. In this role, I utilize technologies such as Laravel, MySQL, CoreUI, and integrate with Facebook marketing APIs.

My responsibilities encompass resolving bugs, implementing new features. Additionally, I have taken the initiative to develop a dashboard for support team, which enables efficient management and control of mobile application issues. This includes addressing user-reported problems and resolving crashes for an improved user experience.

Flyerz is a cutting-edge mobile application that simplifies the creation of social media ads across various channels, providing

users with exceptional results through minimal effort.

## **Agile Business Modules | Mokattam, Cairo** Junior Full Stack Developer | 09/2021 - 04/2023

I worked as a full-stack developer at Agile Business Module Company, an ERP (Enterprise Resource Planning) product-based company. During my tenure, I gained valuable experience working with various technologies, including PHP, MariaDB, AngularJS, and integrating third-party systems with [ETA](#) (Egyptian Tax Authority).

My responsibilities included resolving bugs, implementing new features, and integrating different modules within the ERP system. I also had the opportunity to set up a real-time logging server ([GrayLog](#)) for the project, enhancing the monitoring and tracking capabilities.

Overall, my time at Agile Business Module Company provided me with a solid foundation in full-stack development and the opportunity to contribute to the successful delivery of complex projects.

## Freelancing Projects:

### May 2024 (Present)

I mentor fresh graduates and new freelancers by securing work for them, guiding them through project completion, and supervising their work. I help them develop essential skills in project management and delivery. Additionally, I provide web hosting, maintenance, and consultations to support their technical needs and ensure smooth project delivery.

### Example of completed Projects:

- [Fawzi | UiUx](#)
- [راضى وشركاؤه](#)

### April 2023

I undertook the development and design of the Egy Broker portfolio website. The primary objective of the project was to showcase the works of Egy Broker in an appealing and professional manner.

Using Laravel and Bootstrap, I created a visually engaging website that effectively presents Egy Broker's portfolio. The website highlights their projects, achievements, and capabilities, providing visitors with valuable insights into their work. Moreover, I implemented a user-friendly dashboard specifically for the website administrators. This dashboard empowers the admins to easily update the website content without requiring my assistance.

### Jul 2022

I worked on developing a courses [website](#) owned by Mr. Akmal. During this project, I added new features, resolved numerous bugs, and provided ongoing support to Mr. Akmal in addressing any issues that arose. Additionally, I implemented new customer-requested features to enhance the functionality of the website.

The technologies utilized for this project included Node.js, MySQL, and Bootstrap. Through my contributions, I was able to enhance the overall user experience and ensure smooth functionality of the website.

### Oct 2021

I successfully completed a freelancing project to design and develop the website profile for [Panadora Company](#). The goal of the project was to showcase their works and services in an attractive and professional manner.

I use the customer's front end template that allows visitors to easily navigate through the website and explore the [Panadora portfolio](#) that was .

Furthermore, I created a dashboard specifically for the administrators of Panadora Company. This dashboard empowers the admins to update website content and make changes without the need to rely on external assistance, providing them with greater control and flexibility.

Used Technologies are Laravel 8, MySQL, jQuery and js.

**Aug 2021**

I successfully completed a freelancing project to design and develop the website profile for Babiva Agency. The goal of the project was to showcase their works and services in an attractive and professional manner.

I implemented a user-friendly interface that allows visitors to easily navigate through the website and explore the agency's portfolio.

Furthermore, I created a dashboard specifically for the administrators of Babiva Agency. This dashboard empowers the admins to update website content and make changes without the need to rely on external assistance, providing them with greater control and flexibility.

Used Technologies are Laravel 8, bootstrap 4 , MySQL, jQuery and js.
